(Natural News) Take note, all independent media publishers and vaccine skeptics: A Natural News investigation has discovered the existence of a “secret court” in America which is run by the vaccine industry and is currently issuing *takedown* orders to tech companies and hosting infrastructure companies to cause targeted disruptions (sabotage) of independent media websites that question any official vaccine narrative.

Natural News has learned that these secret court orders are hidden inside **sealed, terminated court cases** which are being laundered through the federal bankruptcy courts but have nothing to do with bankruptcies. They are hidden from public view and assigned a secret code that indicates their real purpose; to disrupt and sabotage the independent media by ordering tech companies to remove websites, de-platform channels or disrupt indy media operations.

The secret court orders are packaged as “Temporary Restraining Orders” demanding “Preliminary Injunction” actions to hosting companies. They are being shotgunned out to ensnare independent publishers who have nothing at all to do with the court cases under which the secret orders are being hidden. In effect, the *vaccine deep state*, as we call it, has **hijacked and weaponized the federal courts to escalate censorship operations to a whole new level.**

Natural News has learned that **dozens of independent publishers are being hit with these TROs** and that the secret orders preclude hosting companies from alerting their own clients to the nature of the sabotage.

We now live in a tyrannical police state where any website can be sabotaged, disrupted or taken down by a secret court order that is fabricated out of thin air, with absolutely no legal justification whatsoever.

Natural News will be bringing you more details in the days ahead.
